

Analyzing Data with Power BI

Modality: Self-Paced Learning

Duration: 4.5 Hours

SATV Value:

CLC:

NATU:

SUBSCRIPTION: Learn, Master

About this Course:

This course will discuss the various methods and best practices that are in line with business and technical requirements for modeling, visualizing, and analyzing data with Power BI. The course will also show how to access and process data from a range of data sources including both relational and non-relational data. This course will also explore how to implement proper security standards and policies across the Power BI spectrum including datasets and groups. The course will also discuss how to manage and deploy reports and dashboards for sharing and content distribution. Finally, this course will show how to build paginated reports within the Power BI service and publish them to a workspace for inclusion within Power BI.

Course Objectives:

- Ingest, clean, and transform data
- Model data for performance and scalability
- Design and create reports for data analysis
- Apply and perform advanced report analytics
- Manage and share report assets
- Create paginated reports in Power BI

Audience:

- The audience for this course are data professionals and business intelligence professionals who want to learn how to accurately perform data analysis using Power BI.
- This course is also targeted toward those individuals who develop reports that visualize data from the data platform technologies that exist on both in the cloud and on-premises.

Prerequisites:

- In addition to their professional experience, students who take this training should have technical knowledge equivalent to the information found in the Azure Fundamentals course.

Course Outline:

- Module 1: Introduction What is Power BI

- Module 2: Power BI Desktop Data Transformations
- Module 3: Power BI Desktop Modelling
- Module 4: Power BI Desktop Visualization
- Module 5: Power BI Service
- Module 6: Working with Excel
- Module 7: Direct Connectivity
- Module 8: Developer API
- Module 9: Mobile App
