Course Duration: 3 Hours

Introduction to CodeIgniter

If you are interested in building websites with the awesome CodeIgniter framework, then you're in the right place.

This fun and fast-paced course starts off with the basics of CodeIgniter for absolute

beginners. You'll learn everything you need to know to get up and running in no time at all. Training in MySQL as it relates to CodeIgniter is an integral part of this course. Don't worry, even if you have never used MySQL before you will learn what you need to know.

Easy to Understand Language

This course is extremely easy to understand for English speakers. When you're learning a new technology, you shouldn't have to strain to make sense of the person giving the tutorial. You won't have that problem here.

The Project

After you learn the basics, you will walk through how to build and deploy a website from scratch, step by step.

Course Outline:

- Introduction to the Course
- Let's Learn CodeIgniter!
- Working with the MySQL Database
- How to Build a Basic Website with CodeIgniter

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
