

Applying Design to Wireframes with HTML5 and CSS3

Modality: Self-Paced Learning

Duration: 2 Hours

About this Course:

This course is featuring advice on typography, graphics, and colour schemes, award-winning trainer Geoff Blake will lead you through the full process of making your site look amazing in every web browser. Lessons include how to select a colour palette, where to source free images, and what resources to use to integrate beautiful typography into your design. You'll discover Google Fonts, and how to integrate them into your CSS. When you're finished adding fonts and images, Geoff will walk you through the various options for testing out your site. From wireframe to fully realized design, this course is a must for aspiring web developers.
