

Starting with REST API's

Modality: On Demand

Duration: 2 Hours

About this Course:

REST works in open-sourced and private application development projects needs to go through this course and absorb all of its content. This not only includes web, mobile, and service application developers, but also architects, UI designers, testers, and administrators. This course provides a solid understanding of how to effectively participate in a project leveraging REST API's both as consumers and providers.

Audience:

- Anyone desiring to learn how REST is implemented in clients and servers needs the knowledge, demonstrations, and practice presented in this course.

Course Outline:

This Course Includes:

- Welcome to Starting With REST API's
- Course Introduction
- Learning REST
- REST Defined
- REST & HTTP
