

Articulate Storyline Basics

Modality: On Demand

Duration: 1 Hour

About this course:

This course will teach you to create engaging training programs using drag-and-drop activities, interactive buttons and hotspots, and rollovers. You will also learn how to add responsive characters, videos, callouts, quiz questions, and audio to slides. Also discover easy ways to create a project from an existing Microsoft PowerPoint presentation, record your screen, and publish your course to Flash, HTML5, and for mobile devices.

Audience:

- Content Developers

Prerequisite:

- There are no prerequisites required for this course

Course Outline:

Introduction

- Using Articulate Storyline

Projects

- Creating a new project
- Creating a project from a PowerPoint presentation
- Saving your project as a template

Slides

- Adding a blank slide
- Changing slide order
- Changing the slide layout

- Using a built-in template to create a new slide
- Using slide templates with build-in interaction

Static Objects

- Adding a text box
- Adding a character
- Changing a character's pose
- Adding a caption

Interaction

- Adding buttons
- Adding interaction to a button or object
