Learning Style: On Demand

Technology: Amazon Web Services

Difficulty: Advanced

Course Duration: 10 Hours

AWS Solutions Architect Certification - Professional Level

About this Course:

This course is designed to provide IT Professionals & App Developers with a comprehensive overview of the key concepts of AWS Solution Architect Certification. This professional-level certification covers the core concepts of

developing, managing, and optimizing AWS Systems. The primary objective of this course is to prepare professionals for success in the AWS Certification Exam.

Course Objectives:

The core objective of this course is to help professionals develop a better understanding and sound knowledge of the following key concepts:

- Virtual Private Gateway & Customer Gateway Essentials
- Architecting & Designing VPNS Solutions on AWS
- Hybrid Cloud Data Migration & VPN Subscription
- Advanced VPC Options including Network ACLs, DHCP, & Elastic Network Interface
- Scaling Direct Connect and Public/Private Interfaces
- Load Balancing, ELB Architecture, and VPC Scaling
- Amazon Redshift Clusters, Data Models, Authorization Techniques, & Use Cases
- Load Spikes Management, IAM Integration, and Dynamo Database Web Federation
- ElastiCache Clusters, Replication Groups, and Redis/Memcached Considerations
- DDOS Protection and Monitoring Pipeline Lifecycle
- CloudTrail Features and Storage Gateway Architecture & Configuration Features
- Simple WorkFlow Service Domains, Lifecycle, and Use Cases
- SNS Fundamentals, EMR Basics, and Kinesis Essentials
- Deployment Management in Elastic Beanstalk and OpsWorks Stack and Optimization

Audience:

This course is tailored for the following group of professionals and interested candidates:

- IT Professionals & App Developers
- Candidates liable for Developing Scalable, Fault-Tolerant, & Available AWS Systems
- Professionals striving to Clear AWS Certification Exam (SAP-C00)
- AWS Certified Solution Architect striving for success in Advanced Certifications

Prerequisites:

Professionals planning to enroll in the AWS Solutions Architect Certification – Professional Level (CT004AC) course must comply with the following prerequisites:

- AWS Solution Architect Associate-Level Certification
- Practical Knowledge of Auto Scaling, Dynamo Database, and Redshift
- Conceptual Know-how of S3, VPC, Elastic Beanstalk, EC2, IAM,

Course Outline:

This Course Includes:

- Course Introduction
- AWS Fundamentals
- Module 1: Hybrid Cloud with VPC
- Module 2: Advanced ELB
- Module 3: Advanced DynamoDB
- Module 4: ElastiCache
- Module 5: Storage Gateway
- Module 6: Elastic Beanstalk
- Module 7: OpsWorks
- Module 8: Advanced CloudFormation
- Module 9: Kinesis
- Module 10: Simple Notification Service (SNS)
- Module 11: Simple Queue Service
- Module 12: Elastic MapReduce (EMR)
- Module 13: Redshift
- Module 14: Data Security Using KMS
- Module 15: CloudHSM
- Module 16: AWS WAF
- Module 17: AWS Config
- Module 18: AWS Systems Manager
- Module 19: Well-Architect Framework
- Module 20: AWS Inspector
- Module 21: AWS Trusted Advisor
- Module 22: S3 Event Notifications
- Module 23: Amazon Lambda
- Module 24: Advanced Auto Scaling
- Module 25: CloudTrail

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge

- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
