Learning Style: On Demand

Technology: Microsoft

Difficulty: Intermediate

Course Duration: 20 Hours

Microsoft Azure Architect Design (AZ-304) + Certification Exam Bundle

***This course is for professionals preparing for the AZ-304 certification exam.
The course also includes the official exam voucher.***

About this Course:

This course teaches Solutions Architects how to translate business requirements into secure, scalable, and reliable solutions. Lessons include design considerations related to logging, cost analysis, authentication and authorization, governance, security, storage, high availability, and migration. This role requires decisions in multiple areas that affect an overall design solution.

Course Objectives:

After completing this course, students will be able to:

- Recommend a solution for Conditional Access, including multi-factor authentication
- Recommend a solution for a hybrid identity including Azure AD Connect and Azure AD Connect
- Recommend a solution for using Azure Policy
- Recommend a solution that includes KeyVault
- Recommend a solution that includes Azure AD Managed Identities
- Recommend a storage access solution
- Design and Azure Site Recovery solution
- Recommend a solution for autoscaling
- Recommend a solution for containers
- Recommend a solution for network security
- Recommend a solution for migrating applications and VMs
- Recommend a solution for migration of databases

Audience:

- This course is for IT Professionals with expertise in designing and implementing solutions running on Microsoft Azure.
- They should have broad knowledge of IT operations, including networking, virtualization, identity, security, business continuity, disaster recovery, data platform, budgeting, and governance.
- Azure Solution Architects use the Azure Portal and as they become more adept they use the Command Line Interface. Candidates must have expert-level skills in Azure administration and have experience with Azure development processes and DevOps processes.

Prerequisites:

Successful Azure Solution Architects start this role with experience on operating

systems, virtualization, cloud infrastructure, storage structures, and networking.

- Understanding of on-premises virtualization technologies, including: VMs, virtual networking, and virtual hard disks.
- Understanding of network configuration, including TCP/IP, Domain Name System (DNS), virtual private networks (VPNs), firewalls, and encryption technologies.
- Understanding of Active Directory concepts, including domains, forests, domain controllers, replication, Kerberos protocol, and Lightweight Directory Access Protocol (LDAP).
- Understanding of resilience and disaster recovery, including backup and restore operations.

Course Outline:

- Course Introduction
- Module 1: Design for Cost Optimization
- Module 2: Design a Solution for Logging and Monitoring
- Module 3: Designing Authentication
- Module 4: Design Governance
- Module 5: Design Security for Applications
- Module 6: Design a Solution for Databases
- Module 7: Design Data Integration
- Module 8: Design Storage Accounts
- Module 9: Design for BC/DR
- Module 10: Design for High Availability
- Module 11: Design a Compute Solution
- Module 12: Design a Network Solution
- Module 13: Design an Application Architecture
- Course Conclusion

Credly Badge:

**Display your Completion Badge And Get The
Recognition You Deserve.**

Add a completion and readiness badge to your

Linkedin profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
