Troubleshooting and Maintaining Cisco IP Networks (CS-TSHOOT)

Modality: Virtual Classroom

Duration: 4 Days

CLC: 31 Units

About this Course:

The updated TSHOOT course adds some important updates and follows an updated blueprint. Some outdated topics have been excluded or revised and simplified, and several other new topics related to IPv6 routing have been included in the curriculum. The technical material has been revised and tailored according to the Cisco IOS Software Release 15.

The objective of the course is to help the student acquire the relevant skills and knowledge from CCNA Routing and Switching and build upon those abilities to plan, execute, and monitor a scalable routing network. The student will also find the course material useful to prepare for Cisco: 300-135 TSHOOT exam.

This course is part of the following Boot Camps:

CS-CCNP-RS Cisco Certified Network Professional (CCNP) Training Boot Camp (CS-CCNP-RS)

A professional Cisco Certified Network Engineer earns an average salary of \$77,484 per year.

Course Objectives:

- Troubleshooting methods, approaches, and processes
- Suggested network maintenance practices
- Employing fundamental and specific troubleshooting tools
- An irrelevant Internet gateway or ISP failing to register a backup connectivity
- OSPF, EIGRP and BGP concerns along with redistribution
- HSRP, VRRP, and GLBP issues
- EtherChannel issues
- Various other issues such as NTP, DNS, default routes, IP SLAs, GRE and AAA
- When headquarters or branch clients are inadequate in accessing internal devices or the Internet

- When a user fails to connect to a network device through SSH or Telnet
- When devices fail to obtain a DHCP-provided address

Audience:

- Network engineers and technicians
- Support engineers
- Systems engineers
- Network analysts
- Senior network administrators
- Professionals entitled to jobs regarding executing, verifying, and troubleshooting routed and switched enterprise networks

Prerequisites:

Students are duly suggested to take the ROUTE v2.0 and SWITCH v2.0 training. Furthermore, knowledge and experience regarding the implementation and verification of enterprise routing and switching technologies should be pursued that includes:
