Learning Style: On Demand

Technology: Amazon Web Services

Difficulty: Intermediate

Course Duration: 2 Hours

AWS & SQL for Machine Learning

About this Course:

The course will explain the basics of cloud computing & databases based on the examples of AWS & SQL. This is seen as complimentary information to the rest of the machine learning course that should help the students with deploying their machine learning models in a real world context.

Course Objectives:

- Understand Advantage/Disadvantages of Cloud Computing & Databases
- Get an overview of various providers & their services
- Understand in what situation local computing/storage vs cloud computing should be used

Audience:

This course is intended for:

- Machine Learning Engineers

Course Outline:

This Course Includes:

- Course Introduction
- Lecture 1: Databases
- Lecture 2: Cloud Computing
