Learning Style: Virtual Classroom

Technology: Red Hat

Difficulty: Advanced

Course Duration: 5 Days

Red Hat Satellite 6 Administration (RH403VT)

About this Course:

Before going into the details of this particular course, let us take a look at Red Hat. Basically, Red Hat is an American software company which has its offices in multiple countries all over the globe . Red Hat was originally founded in 1993 and has its headquarters in Raleigh in the state of North Carolina.

As technology takes over the world , almost all industries are becoming more and more reliant on the latest tech as an integral part of their day to day operations . Red Hat has become widely popular and a red hat systems administrator usually earns up to **$72,762** per year as per an estimate.

This course is designed with an emphasis on the management of the software development life cycle of a subscribed host via the use of Red Hat Satellite. Participants will also be trained to configure the aforementioned software development lifecycle. This course will also focus on the methods and techniques required to provision hosts integrated with software and Puppet configuration

management upon deployment.

Course Objectives:

By the end of this course, the students should be have learnt the following skills and be able to;

- Learn how to efficiently install Red Hat Satellite 6.
- Gain a comprehensive understanding of Red Hat network organizations, locations, users and roles.
- Learn how to effectively manage software with Red Hat Satellite environments and content views.
- Gain the skills needed to design tailored RPM packages.
- Learn how Red Hat Satellite can be used to configure hosts with Puppet.
- Understand the concept of provisioning hosts with integrated software and configuration management and implement it.
- Learn how to execute Metal-as-a-Service (MaaS) with Satellite discovery and provisioning of unprovisioned hosts.

Audience:

This course is targeted towards the following audience;

- Those Senior Red Hat Enterprise Linux system administrators whose job title requires them to be responsible for the management of multiple servers

Prerequisites:

These are the prerequisites which are an absolute requirement for attending this course.

- A Red Hat Certified Engineer (RHCE) certification is strongly recommended or equivalent experience.
- A minimum of 5 year experience working with Red Hat Satellite .

Suggested prerequisite course:

The following courses are suggested to be taken prior to attending this course

- Red Hat System Administration I (RH124)
- Red Hat System Administration II (Virtual Training) (RH134VT-EC)

Course Outline:

Red Hat Satellite installation
Install Red Hat Satellite 6 on a server and populate it with Red Hat Enterprise Linux software content.
Red Hat Satellite organization
Effectively control user access for Red Hat Satellite administration.

Red Hat Satellite client registration
Register hosts to a Red Hat Satellite server, both interactively and automatically.
Incorporate software management into SDLC
Control which packages hosts can install and which updates are propagated to hosts. Evaluate host deviations from corporate standards.
Deploy custom software using Red Hat Satellite
Incorporate non-Red Hat software packages into a Red Hat Satellite framework.
Configuration management with Puppet
Create and populate a Puppet repository within a Red Hat Satellite framework.
Centralized management and deployment of system configurations
Configure hosts using Puppet.

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your Linkedin profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
