Introduction to Web Design

Modality: On Demand

Duration: 8 Hours

About this Course:

This course has been developed for both complete beginners and those who already have a limited knowledge of web design. Aspiring web designers, web developers who want to understand the design side of the business, and graphic designers - as well as those from completely unrelated disciplines - will all be more than capable of handling the content of this course.

Learn Web Design from Scratch

- Understand the basics of CSS and HTML
- Learn about current web designing trends and developments
- Gain an insight into web development, debugging, etc. as well as design
