**Course Duration:**

## Containers Fundamentals (LFS253)

This course will teach you how to do container and image operations with different container runtimes, manage network and storage (volumes) with containers, build and run multi-container applications with Docker, Podman, Docker APIs, etc.

### Course Outline:

- Chapter 1. Course Introduction
- Chapter 2. Virtualization Fundamentals
- Chapter 3. Virtualization Mechanisms
- Chapter 4. Container Standards and Runtimes
- Chapter 5. Image Operations
- Chapter 6. Container Operations
- Chapter 7. Building Container Images
- Chapter 8. Container Networking
- Chapter 9. Container Storage
- Chapter 10. Runtime and Containers Security

## Credly Badge:

### **Display your Completion Badge And Get The Recognition You Deserve.**

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
