

Capstone Project: Analyzing the COVID 19 Pandemic

Modality: On Demand

Duration: 14 Days

A Data Science team at a top-tier hospital in Brazil has released a dataset on the Kaggle platform which seeks interesting solutions and findings from the public. The team is using ML to help reduce the strain on hospital's ICU beds, where the objective is to develop a ML model to predict if a patient of a confirmed COVID-19 case will require admission to the ICU.

Course Outline:

This Course Includes:

- Analyzing the COVID-19 Pandemic
- GitHub
- Predicting COVID-19 ICU Admissions
