**Learning Style:** On Demand

**Technology:** Microsoft

**Difficulty:** Intermediate

**Course Duration:** 13 Hours

## Designing Microsoft Azure Infrastructure Solutions (AZ-305)

### About this Course:

This course teaches Azure Solution Architects how to design infrastructure solutions. Course topics cover governance, compute, application architecture, storage, data integration, authentication, networks, business continuity, and

migrations. The course combines lecture with case studies to demonstrate basic architect design principles.

## **Course Objectives:**

- Design a governance solution.
- Design a compute solution.
- Design an application architecture.
- Design storage, non-relational and relational.
- Design data integration solutions.
- Design authentication, authorization, and identity solutions.
- Design network solutions.
- Design high availability solutions.
- Design backup and disaster recovery solutions.
- Design monitoring solutions.
- Design migration solutions.

## **Audience:**

Successful students have experience and knowledge in IT operations, including networking, virtualization, identity, security, business continuity, disaster recovery, data platforms, and governance. Students also have experience designing and architecting solutions.

## **Prerequisites:**

Before attending this course, students must have previous experience deploying or administering Azure resources and conceptual knowledge of:

- Azure Active Directory
- Azure compute technologies such as VMs, containers and serverless solutions
- Azure virtual networking to include load balancers
- Azure Storage technologies (unstructured and databases)
- General application design concepts such as messaging and high availability

## **Course Outline:**

This Course Includes:

- Course Introduction
- Module 1: Design Governance and Compute Solutions
- Module 2: Design Storage and Data Integration Solutions
- Module 3: Design App Architecture, Access, and Monitoring Solutions
- Module 4: Design Network, Continuity, and Migration Solutions
